

SPECIAL PURPOSE MACHINE

We design and manufacture Special Purpose Machines (SPMs) engineered to deliver speed, precision, and reliability. Serving the automotive, Packaging, electrical & other industries, our solutions help manufacturers achieve higher productivity, consistent quality, and lean operations.

Key Features

- Tailor-made design for customer requirements.
- PLC/HMI-based intelligent control systems.
- Fully Robot/Cobot/Vision Integration
- Multi-station working for faster cycle times
- High rigidity for accurate machining
- Seamless integration with Industry 4.0 platforms.

Advantages

- Increased productivity (up to 40% faster than conventional setups)
- Reduced manpower requirement
- Consistent quality & repeatability

Application

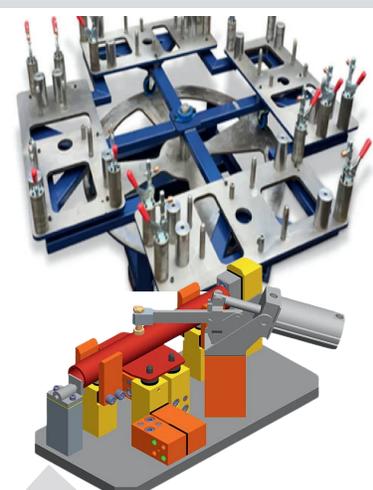

EOL Inspection

Assembly Machine

Testing Machine

Jig & Fixtures
